## **Report On Laser Florence 2012**

As each year, Laser Florence 2012 has had a good success and new data were presented to the scientific community, for prompt transfer to clinical practice. New data shown in Laser Florence 2012 are listed below:

- 1. Follow-up of patients with traumatic spinal cord lesions treated with LASER therapy. This procedure was started almost nine years ago. So far 168 patients have been treated. Of these nearly all have shown consistent improvement of sensory and motor functions below the level of lesion. Some have acquired anal sphincter and sexual function. 8 of them have been able to start walking again. Others have shown partial improvement. Only 4 were completely unsuccessful. 35 patients have stopped treatment for various reasons (i.e. impatience or very slow improvements).
- 2. LASER therapy on stem cells taken from the bone marrow. It is possible with this method to promote obtain stem cells which differentiate in to adipose and connective cells, nerves, tendons and so on. It is not necessary to obtain cells in vitro adding other substances such as growth factors. Treated of Traumatic spinal cord lesion with LASER irradiated stem cells has been started.
- 3. New LASERs have been used in the treatment of traumatic sport lesions, epicondilitis, bursitis, sprains and in pain due to acute and chronic fibromyalgia. The mechanisms of action of these LASERs have been clarified.
- 4. LASER therapy in infections, particularly those resistant to antibiotics (i.e. Skin and mouth staphylococcus infection as well as onicomicosis.
- 5. New technologies of LASER guided microsurgery guided by GPS system for the treatment of cervical, dorsal and lumbar hernias without scalpel tissue incision and in day-hospital.

## December 2012

- 6. Combined LASER and pulsed light therapy of cheloids and hypertrophic scars.patients with extensive face scarring and cheloids resulting from third degree burns have been treated with success.
- 7 New techniques with diagnostic LASER for the early diagnosis of pancreatic cancer and intestinal cancer have been shown.

Please find below the final program of our annual congress. The IALMS member could read the abstracts book on line, on the web.site of our journal "Laser in Medical Sciences".

#### PLENARY LECTURE - Room A - November 9th, 2012

Chairman: C. Enwemeka, M.L. Pascu, E. Sykova

| Chan  | nani: C. Enwemeka, M.L. Pascu, E. S | ykova   |

## December 2012

## Report on the IALMS Assembly, Florence, Nov. 10<sup>th</sup>, 2012

#### Activity done in the year 2012 and programmed for the year 2013

- 1. Link with WALT conference in Australia, September 2012
- 2. Co-sponsor NESA Conference, Palma de Maiorca, 13-16 September, 2012
- 3. Co-sponsor 14<sup>th</sup> APALMS Congress, Taipei, 22-25 November, 2012
- 4. Link with ISLSM / WFSLMS Conference in Paris, June 2013
- 5. Co-sponsor IPTA Congress, Vilnius, September 2013
- 6. Laser Florence? See questionnaire

#### Points raised

#### **Questions and Answers**

**Question**: Since the participants to LASER Florence have remained the same in number as in the last years do you prefer the conference to be held each year or every two years? **Answer**: Out of twenty participants, 13 voted for the conference to be held every two years and 2 each year. It was decided to send a questionnaire to all IALMS members. The results will be shown as soon as they are available.

#### Master in LASER

Proposed 2 years plus 1 of specialization. We have no difficulty in organizing them but there are legal aspects, different in different states. Enquiries have been made for one state university to start with the first year of the course. Lithuania, Czech Republic and Poland proposed to host the course. The question is still open.

#### Further IALMS news

LASER FLORENCE Congress was honored by an offer made by an anonymous NOBEL PRIZE winner, member of the American Society Of Physics, AIP. The offer consisted of money for the publication of LASER FLORENCE 2011 SELECTED PROCEEDINGS. The offer has been gratefully accepted.

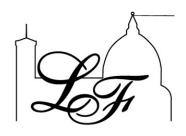

## December 2012

26<sup>th</sup> International Congress Laser Medicine & IALMS Courses Jointed with Congress of the International Photo Therapy Association

# **Laser Florence 2012**

.....Trust and order on Laser Medicine World

## December 2012

### November 9th, 2012

- PLENARY LECTURES
- LASER BIOMODULATION 1 SCIENTIFIC RESEARCH
- LASER BIOMODULATION 2 CLINICAL PRACTICE
- TRENDS IN BASIC AND APPLIED RESEARCH IN LASER BIOMEDICINE
- TALK POSTER SESSION

19:15 Open Ceremony with Welcome Cocktail and leading lecture

#### November 10th, 2012

- LASER DENTISTRY
- LASER SURGERY
- LASER DIAGNOSIS
- LASER/LIGHT AND SKIN

20:30 Gala Dinner, Awards Assignation, Music show and Closure Ceremony

#### **ORGANIZED BY**

## December 2012

#### **NETWORKS GENERATED BY LASER FLORENCE CONFERENCES**

1997: Pulse light for vascular lesions, advantages and limits. Endovascular laser therapy for various veins. Indication and contraindications for Laser resurfacing procedures.

1998: mechanism of action, ant inflammatory and anti-edema effects of Laser. Advantages and limits for laser in dentistry. Types of laser recommended for treatment of telangiectases and reticular veins.

1999: Prostatectomy laser. Non surgical endovenous laser modulating the immune system. Advantages and limits of Laser and IPL as hair removal techniques.

2000: PDD and PDT for the treatment of gastrointestinal and urological cancers. Laser therapy for wound healing and skin ulcers. , stretch marks, scars, keloids. Laser and IPL in skin rejuvenation.

2001: Laser treatment for diabetes type 1 and 2 (live demonstration on patients during the congress, probably, for the first time in the world). Advantages and limits of pulsed light in aesthetic medicine and surgery. What kind of laser should be in rheumatology and sport traumas? Role of European Community and World Health Organization in these issues.

2002: Laser Treatment of disk Hernias. Laser and light treatment for Psoriasis and Vitiligo.

2003: Laser therapy for nervous cells regeneration, in vitro and experimental. Complications of laser and light therapy and their treatment. Selection of affordable instrumentation. Advantages and limits of laser in ophthalmology. Position of FDA and other International Institution on non surgical laser.

2004: laser therapy of spinal cord injuries in clinical practice; first diabetic patients treated with laser in Italy, following Helsinki declaration rules; news on mechanisms of ant inflammatory and regenerative effects of lasers on the human tissues; prostatectomy laser in day surgery; advantages and limits of endoluminal laser surgery of varicose veins; laser coupled with radio frequency scalpel for skin lesion treatment. Laser treatment of progenitor cells.

2005: Cesarean incision with laser. Photodyalisis laser for chronic degenerative conditions. Follow-up of laser therapy for diabetes. Laser therapy of traumatic spinal cord injuries. Action mechanism of laser beam on nervous tissue.

2006: Photopletismography multi laser in vascular diseases. News substances for PDT of lung cancer. Ant inflammatory and regenerative mechanisms of laser treatment of experimental myocardial infarct. News on Laser therapy in sport traumatology Radio protective effects of non surgical laser.

2007: Laser in stem cells therapy: preclinical phase. Laser therapy for traumatic and degenerative spinal cord injuries with live patients presentation. Follow-up of laser therapy in diabetes type 1 e 2. Laser therapy for female infertility. Laser vascular and aesthetic surgery. State-of-the art on laser dentistry and PDD/PDT.

2008: Laser in brain traumatic injuries; Laser therapy for male infertility. Laser and energetic medicine; laser and nervous progenitor cells.

2009: Guidelines for the use of non surgical lasers. Laser Diagnosis. Laser therapy for infertility. Laser and stem cells

2010: Follow up of positive results on central nervous system traumatic injuries. Laser therapy for peripheral nerve reconstruction. Laser therapy for prevenction of central nervous system post-traumatic damages. Laser diagnosis of early cancer of lung, uterus, breast, urinary bladder, prosthate. Laser and photodynamic therapy of prosthate cancer and lung cancer. Laser therapy of the menopause. Light for improving the follow-up of laser therapy of diabetes. Laser and stem cells for treatment of myocardial lesions.
